

Map 11. Geographic distribution and frequency of sampling with bongo/Tucker gear during Recruitment Processes Program ichthyoplankton surveys for 1972-2015. Area sampled is divided into 625 km² cells. Numbers on or over bar in histogram equal number of cells that contain 1-10 stations (yellow), 11-50 stations (green), 51-100 stations (blue), and 101-319 stations (red).
